

The BIN SCREEN is an easily removable cover for the 4x4 bin boxes used for fermenting the grapes at the time of harvest.

The BIN SCREEN prevents fruit flies and other debris from entering the bins.

The BIN SCREEN fits snugly on the bin and is tightened with a quick release Velcro/nylon webbing corner strap. All seams are heat sealed and exterior edges are finished with double folded webbing.

A lifetime product made of Polypropylene woven industrial fabric, as used in the environmental, transportation and construction industries.

Use inside or outside. 90% UV resistant and ISO certified with ASTM standards. Having earned the title of being an "Ultimate fabric as a world leader in quality and consistency.

Lightweight yet extremely durable giving you the option to stack the bins without removing the screen.

Sanitary. Will not inhibit bacterial growth or mold and will not hold absorb or hold liquids.

Easy to clean. Use any method you might already use on your grape processing equipment, hot high pressure, solvents, germicides or sanitizers.

Breathes well to let out fermenting gases.

**YOU WILL NEVER HAVE TO REPLACE THIS PRODUCT !!!!**

As always, quality materials and lasting workmanship in every product.
